INVITATION

Combisegments® - Perfect Concrete Protection for Utility Tunnels

Presenters: Stefan Medel, Managing Director
Herrenknecht Formwork Technology GmbH

Date & Time: Thursday, September 19, 2019
Doors and registration: 5:30pm
Presentation: 6:00pm

Location: Lone Star Texas Grill
930 Dixon Rd, Toronto, Ontario

Cost: TAC Members: \$5 at the Door
Non-Members: \$10 at the Door
Government Employees: \$5 at the Door

RSVP: It isn't required to RSVP, but please notify
onttac@gmail.com if you plan to attend.

Presentation Overview

Combisegments® from Herrenknecht Formwork meet the need for future-proof and reliable concrete protection in tunnelling with the segmental lining process. Combisegments® are corrosion-resistant and hydraulically optimized segments that are fitted with a Combisegments® protective lining and an integrated sealing frame during production.

As a part of the project "Mississauga West Trunk Sewer Phase 2", Combisegments® with a 5 mm thick Sure Grip Liner were successfully installed over a length of 110 m. The presentation includes practical experience gained during production and installation of the Combisegments® in the tunnel.

Speaker Bios:

Stefan Medel holds a degree in Civil Engineering and has worked for two of the best-known construction companies in Germany: as construction manager for Bilfinger Berger and as director of several segment production jobs for Züblin. In December 2007, he started as Managing Director of Herrenknecht Formwork Technology GmbH. Under his leadership, Herrenknecht Formwork has become one of the leading suppliers for tunnel lining segment production equipment. The company realized more than 230 projects in 40 countries with more than 6 million concrete segments produced with Herrenknecht Formwork moulds.
