Tunnelling Journal has formed a partnership with the Tunnelling Association of Canada (TAC). The Canadian Tunnelling magazine was first published back-to-back with Tunnelling Journal's September issue in 2021, and will be with the February/March and September issues in 2023. Distributed with Tunnelling Journal's full international circulation, plus all TAC members, and at the TAC Conference in 2023. A digital edition will also be made available on the TAC and Tunnelling Journal websites.

TAC Corporate Member Rates

1 Insertion - 10% Discount

Full Page - US\$4,725.00

Half Page - US\$2,835.00

Quarter Page - US\$1,701.00

2 Insertions - 25% Discount*

Full Page - US\$3,938.00

Half Page - US\$2,363.00

Quarter Page - US\$1,418.00

*The 2-insertion offer applies to any combination of advert size (full page, half page, quarter page) in the February/March and September issue in a calendar year.

TAC Corporate Members Directory +

Published annually with the February/March issue of Canadian Tunnelling. Exclusive offer to TAC Corporate members only, gives you the opportunity to highlight your company's products and services. Take a full-page advert and get a full page company profile included. Take a half page advert and get a half page company profile included.

WE WORK WELL UNDER PRESSURE

ASI Group Ltd. (AGI) is proud to be the first Canadian company to provide hyperbaric tunneling support services across North and South America.

AGI provides ON-SITE SUPPORT:

- Permeability maintenance
- Cleaning of equipment
- Repair welding on cutter head and its components
- Tooling replacement
- Tooling modification/changes
- Support for all major CAJOC
- Shrink tape conversion/welding pressure

Our team will be with you onsite during each stage of the project. AGI personnel are specially trained to perform specialized, repair and replacement services in high pressure environments, keeping your TBM operating efficiently to avoid any delays.

Securely plan your tunnelling project with ASI: tunnelling@asi-group.com

TAC Corporate Directory plus

Our Commercial Dive team leverages their experience working in pressurized environments to provide hyperbaric intervention support for tunnel construction projects.

AGI has successfully planned, supervised and performed over 500 hyperbaric interventions!

AGI has been involved with tunnels around the world for well over 20 years. AGI provides Hyperbaric Support and Consulting for Tunnel Construction, feasibility planning and completing over 500 hyperbaric interventions to date. AGI's fleet of Certified Vehicle (BVOC) operators, specialists in long distance roaded tunnel operations, displaying an array of inspection instrumentation for accurate data collection. We are very proud to report that AGI has performed the longest single accurate inspection in the world @ 50km.

Hyperbaric: AGI is the first company in Canada to offer hyperbaric support for tunnel construction. For US based projects, AGI partners with Associated Underwater Services (AUS). AGI and AUS's unique experience and application of innovative techniques and best practices is well suited to support all projects needs.

Hyperbaric: AGI's team of subject matter experts in underwater data collection, analysis & trend of project specific, projects that are equipped with the latest in sensor and video imaging, surveying and inspection technologies. As a whole, AGI is a leader in the application of latest technology in making highly accurate 3D models of underwater infrastructure.

Our services are provided from numerous offices located in Canada and the United States.
